Exercises Group
Wednesday

Part 1, Basics Summary

100% weekly exercises and 51% Kattis
42.5 score in Kattis End of first part

Part 2, Application Summary_ Spinderella_

I am responsible for the last code check-up, including finding and debugging. I also did most of the report (designing the content and explaining the report's code), prepare for the team presentation. Our team was inconsistent in the work we did, so in the process of working on the project, we tended to do each others work too, such as I also contributed a bit in the algorithms, the UI of the game file extract and poster designing. In this project I estimate I did around 30% of the work we had 2 feedback talks , one on 25th of January the other is on the 1st of February
